EDUCATION

SRM Institute of Science and Technology, Chennai

Bachelor of Technology in Computer Science Engineering

CGPA (till 6th semester): 9.13/10

Sep. 2022 – May 2026

EXPERIENCE

Software Developer Intern

Jun. 2025 – Sep. 2025

Kalvium

Bangalore, India

- **Worked closely with the CTO** to build a **Chrome extension using ReactJs and Supabase** to help students solve competitive programming problems, converted into an **NPM package using Typescript**, wrote **100 tests with Jest** and **onboarded 20+ users** to validate the PoC.
- Conducted daily sessions on **LLMs and building agents with GenAI**, attended by 400+ students, with 250+ completing hands-on projects.

Software Engineer Intern

Mar. 2024 – Mar. 2025

Emendo.AI

Remote, USA

- Collaborated and maintained a cross-platform mobile app (**React Native Expo**) and company website (**Next.js**), ensuring feature parity and consistent performance.
- Developed **30+ reusable UI components** using **React Native**, **TypeScript**, and **NativeWind**, improving code maintainability and accelerating feature development.
- Created and maintained **100+ Maestro tests**, helping improve application quality by reducing bugs and ensuring reliable, consistent product performance.

Samsung Prism R&D Intern

Feb. 2024 – Sep. 2024

Samsung R&D Institute India

Remote, India

- Facilitated **10+ collaborative ideation sessions** to investigate and prototype **35+ research-based concepts**.
- Spearheaded end-to-end development of an **MVP with machine learning features**, including integration, testing, and deployment of the entire Project.

PROJECTS

CourseGPT | *NextJs, TailwindCSS, Hono, Gemini 2.0, Vercel*

- Engineered a platform using **Gemini 2.0** to **auto-generate modular courses** (lessons, quizzes, labs) and **detailed lesson content** from user prompts, enabling **single-click curriculum generation**.
- Developed a scalable Next.js/TailwindCSS frontend with Hono backend, deployed on Vercel, ensuring **seamless content delivery and real-time user interaction**.

Educative.AI | *Python, FastApi, React.Js, TailwindCSS, LLMs, Tensorflow*

- A student aiding and notes organizing application that seamlessly **integrates an OCR model and 10+ fine-tuned open-source LLMs**, designed to assist with notes alongside blackboard pictures.
- Designed and Developed a responsive **React/TailwindCSS** dashboard integrated with a **FastAPI backend**, featuring 3 modules (note management, OCR processing, LLM-driven Q&A) to streamline student workflows.

One Med | *React.Js, React Native, Python, FastAPI, PostgreSQL, LLMs, Tensorflow*

- Electronic Health Repository (EHR) platform **integrating AI and mobile applications** to enhance healthcare management and patient care, **recognised as a top 10 project at MozoHack 2024**.
- Key features including a React Native mobile application for **syncing emergency medical conditions**, a hospital dashboard for **efficient information management**, and AI technologies for **automating medical record summarization and consultation transcription**.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C/C++

Frameworks: React, NextJs, React Native

Database: MySQL, PostgreSQL, MongoDB

Cloud & Devops: AWS, Vercel, Supabase, Docker, CI/CD

Others: ServiceNow, Sanity.io, Sentry, Axiom

CERTIFICATIONS

Certified System Administrator

ServiceNow

Issued on: November 04, 2024

Certification number: 25721448
